

Notes for using the data:

- The data are calculated from the antibiotic sales in each prefecture of Japan.
- The data do not always reflect the actual use of antibiotics in healthcare settings.
- The data based on only the sales of antibiotics for use in humans and do not include the sales of antibiotics for use in animals or for addition to feed.
- The definition of antibiotic drugs is taken from J01 of the ATC classification published by the WHO (i.e., oral metronidazole, which belongs to P01, is not included).
- The figures indicate drug utilization standardized by defined daily dose (DDD) per population and drug, called DID (DDDs/1,000 inhabitants/day).
- The DDD is according to data published on January 1, 2017.
- The population is according to estimates published by the Statistics Bureau, Ministry of Internal Affairs and Communications.
- 0.000 indicates a value less than 0.001.

Change in antibiotic sales in Japan (2013–2019) by ATC3

Change in antibiotic sales in Japan (2013–2019) by route of administration

Change in antibiotic sales in Japan (2013–2019) by AWaRe Classification 2019
